SIR RIZWAN RASHID

SEMESTER END PROJECT

"Education Helper"

OVERVIEW

This semester end project "Education Helper" is specifically build for students of both Medical and Engineering field. This project is console based and is fully made in Java.

FEATURES

- ➢ This program will first ask the user to make a profile (name, email, password, FSC marks).
- ➢ The program will then ask user to select a country in which he wants to study.
- ➢ After selecting country, the program will then ask the user to select city of that country.
- ➢ The program will then ask whether the user is a medical student or engineering student.
- ➢ After selecting any above mentioned choice, the program will display a list of Colleges/Universities of that field.
- ➢ The user will then select best choice from the list according to his FSC marks.
- ➢ In the end the program will display all the information related to that College and University.
- ➢ In the end the user can either quit the program or either he can restart the program to select another college.

The program will be made on the following mentioned syntax of Java

- ➢ Loops (While, For)
- ➢ If else statements
- ➢ Methods
- ➢ Arrays
- ➢ Lists
